OFFICERS OF THE COLLEGE.

President.—The Rt. Hon. LORD REAY, G.C.S.I., LL.D.
Vice-President.—The Rt. Hon. LORD MONKSWELL.
Treasurer.—*Sir RICHARD FARRANT.

COUNCIL.

THE PRESIDENT. THE VICE-PRESIDENT. THE TREASURER.

*Walter Baily, M.A.
*J. Bourne Benson, LL.D.†
Professor J. R. Bradford, M.D., D.Sc., F.R.S.†
Sir Edward H. Busk, M.A., LL.B.†
Michael Carteighe, F.C.S.
The Rt. Hon. Lord Fitzmaurice.
*G. Carey Foster, B.A., LL.D., D.Sc., F.R.S.†
*Principal T. G. Foster, B.A., Ph.D.†
*Professor E. A. Gardner, M.A.
*H. A. Harben.
Professor Vaughan Harley, M.D., M.R.C.P.
Henry Lucas.
*Professor Sidney Martin, M.D., F.R.S.
C. G. Montefiore.
*Professor J. W. Neill.
Sir John Rotton, M.A., LL.B., K.C.
*Principal Sir Arthur Rücker, F.R.S.
Felix Schuster.
*W. Arthur Sharpe.
*Professor E. H. Starling, M.D., B.S., F.R.C.P., F.R.S.
*A. Cotterell Tupp, B.A., LL.D.

AUDITORS.

George A. Aitken.
John Hennell, B.A.
Edwin Waterhouse, B.A., F.C.A. (*Professional*).

Principal.—T. GREGORY FOSTER, B.A., Ph.D.†

Lady Superintendent of Women Students. } Miss Rosa Morison.

Secretary.—Walter W. Seton, M.A.

* Member of the Committee of Management.
† Fellow of the College.

SENATE.

President.—T. GREGORY FOSTER, B.A., Ph.D.*

Vice-Presidents.—The Rt. Hon. Lord Monkswell.†

Sir John Rotton, M.A., LL.B., K.C.†

	Appointed
T. W. Arnold, B.A.	1904
A. E. Barker, F.R.C.S.†	1892

		Teacher.
Surgery	A. E. Barker, F.R.C.S.†..	Professor.
Therapeutics	H. Batty Shaw, M.D., M.R.C.P.*	Lecturer.

[The Professors of Botany, Chemistry, Hygiene & Public Health, Pathology & Morbid Anatomy, Physics, Physiology, and Zoology & Comparative Anatomy are also Members of this Faculty.]

* Fellow of the College. † Life Governor of the College.

REPORT OF COUNCIL

To the Members, at the Annual General Meeting, Wednesday, February 21st, 1906.

I. PUPILS AND FEES.

SESSION 1904–1905.

The total number of Pupils during this Session was 1754, being an increase of 64 on that of the preceding Session. Of these 1323 were Students in the College, and 431 Pupils in the School. Of the Students, 241 belonged to the Faculty of Medicine, 70 being new Students: in the Faculties of Arts and Laws and of Science there were 963 Students, 519 being new Students: 440 Students were registered as "Internal" Students of the University of London: 119 Students were registered as Post-Graduate and Research Students. The largest number of Boys in the School and in the Branch School in any one Term was 456.

In the Faculties of Arts and Laws and of Science these figures show, as compared with the preceding Session, an increase of 24 in the new Students and a total increase of 88: and in the Faculty of Medicine a decrease of 18 in the new Students, and a total decrease of 22.

The Fees received (exclusive of those for Clinical Instruction) amounted to £28,478 14*s.* 7*d.*, being £2,733 11*s.* 1*d.* more than in the Session 1903–1904.

The total fees for the two Sessions compared were as follows:—

	1904–1905.			1903–1904.		
	£	*s.*	*d.*	£	*s.*	*d.*
Faculty of Medicine	2,826	1	6	3,070	14	6
Faculties of Arts and Laws and of Science	17,412	5	1	14,422	10	0
School	8,240	8	0	8,251	19	0
	£28,478	14	7	£25,745	3	6

In addition to the above-stated amounts, the sum of £1,084 13*s.* 0*d.* was received for Clinical Instruction in the Hospital, making a total of £3,910 14*s.* 6*d.* paid by Students of the Faculty of Medicine, being £402 3*s.* 0*d.* less than in the Session 1903–1904.

THE CURRENT SESSION.

The entries of Students to February 1st, 1906, have been as follows:—In the Faculty of Medicine, 190, of whom 53 are new Students; in the Faculties of Arts and Laws and of Science, 891, of whom 426 are new Students.

The entries in the School, in Michaelmas Term, were 384, of whom 87 were new pupils: in the present Term, 374, of whom 20 were new pupils; adding the 64 Boys in the Branch School at Hampstead, this makes 438 in all.

The College Fees received to February 1st are £2,437 11*s.* 6*d.* in the Faculty of Medicine, and £14,361 18*s.* in the Faculties of Arts and Laws and of Science. This shows an increase of £2,453 6*s.* 6*d.* as compared with the same date of last Session.

II. GENERAL FINANCES.

Financial Year 1904–1905.

The Accounts for the year (1904–05) are printed at the end of this Report (see pp. 52–57).

Income and Expenditure.

The excess of expenditure over income for the financial year ending August 31st, 1905, was £10 2*s.* 10*d.*

There has been a satisfactory increase in the total income received from College fees, notwithstanding that there has been a decrease of Clinical and Branch School fees.

Parliamentary Grant.

The most noteworthy features on the Income side of the College Establishment Account are:—

(*a*) The special Parliamentary Grant of £700 for Apparatus and Books, of which £464 18*s.* 11*d.* was expended in the financial year under a scheme approved by the Treasury.

(*b*) The increase in the College share of the grant to University Colleges, making the amount available for the financial year £6,750.

(*c*) The absence of any debt to the Bankers made it possible to place sums on deposit or out on loan, resulting in interest to the amount of £67 13*s.* 2*d.*

(*d*) The decrease in the income of the Holme Fund is due to the change of investments. The charges made on the Fund on account of Medical School Expenses were greater than the income: the deficit is made good from general College funds.

London County Council payments.

The London County Council continued their Grant of £1,500 to the College and made supplementary payments of £195 16*s.* 3*d.*, being the balance of the grant of £500 for equipment, and of £1,565 in consideration of additional free places. The Council's payments to the School amounted to £2,400 on account of free places, books, stationery, and examination-fees of County Scholars and of contributions to the salaries of the special staff for the Commercial Department.

Subscriptions and Donations.

Subscriptions and Donations (see Appendix I. p. 33) including the Crabb Robinson Grants amounted to £1,432 17*s.*, of which £712 12*s.* 11*d.* was for special purposes and the balance was for general purposes.

Expenditure.

On the Expenditure side of the College Establishment Account it will be seen that the third portion of the New Drainage and Sanitary Works was carried out at a cost of £1,808 14*s.* 5*d.*, the whole of which has been at present charged to current income. The increase in the Parliamentary Grant make it possible to carry out certain much needed improvements, and to extend further the electric light installation. A further sum of £400 has been written off the Chemistry Alterations Account, thereby reducing the debt on that account to £383 15*s.* 8*d.*

Debts and Loans.

The debt to the Trust Funds Account has been further reduced by the investment of £500, so that the amount from Trust Fund accounts in hand at the end of the financial year was approximately the amount of the quarter's dividends at the opening of the new financial year. The amount borrowed from the Equipment and Endowment Fund Committee at the end of the financial year was £5,500. This debt together with the other liabilities given on p. 56 and after deducting the amount of the cash assets, £1921 16*s.* 2*d.*, makes the net liabilities of the College at the end of the financial year £9,830 12*s.* 3*d.*

The Current Financial Year.

In view of the increased Parliamentary Grant and of the general improvement in the College finances, the Council have with the approval of the University Senate extended the method of payment by fixed stipends together with five twenty-first parts of their fees to most of the professors in the Faculties of Arts and Laws and of Science. The salaries of professors will thus be more stable and will be somewhat higher. The salaries of the other members of the Teaching Staff will also be improved.

Under a scheme for the gradual re-modelling of the College buildings to suit new conditions, the Department of Physics was during the last long vacation enlarged and improved: two new rooms were added to the Department of Chemistry. The cost of these improvements and of additions to the equipment of the College will amount to £3000.

The general scheme of College finance has been carefully reviewed and important changes made. These will appear in the report and accounts of next year.

The importance of maintaining and increasing the subscriptions and donations to the College must again be emphasised, as the grants of the Treasury and of other bodies depend to some extent on them.

The budget for the year has been framed with every economy consistent with efficiency.

III. SCHOLARSHIPS AND OTHER DISTINCTIONS AWARDED IN THE COLLEGE *.

A. *FACULTIES OF ARTS AND LAWS AND OF SCIENCE.*

Slade Fine Art Scholarships (£35 per annum for two years):—
Maribel Rough, *S. Boyd.*

Melvill Nettleship Prize for Figure Composition:—Ethel Carrick.

Slade Fine Art Prize for Composition (£25, div. eq.):—
R. E. Schwabe, W. I. Strang.

Andrews Entrance Scholarships (£30):—
English History and Languages. } A. C. Wood.
Science, W. F. Stanton.

Andrews Scholarships for Students of one year's standing (£20):—
Classics, Daphne Ryder.
Science, H. E. Watson.

Jews' Commemoration Scholarship (£15 per annum for two years):—W. D. Reynolds.

Quain Law.—Professor's Prize of £15 for an Essay on "Changes in the Forms and Methods of International Arbitration since 1856":—A. E. Hogan.

* Names printed in *italics* are those of former pupils of University College School.

Joseph Hume Scholarship in Political Economy (£20):—H. D. Vigor.

Jessel Studentship:—Winifred Gibson, B.Sc.

Ricardo Scholarship in Political Economy:—H. D. Vigor.

West Scholarship in English:—A. J. Clark.

Campbell Clarke Scholarship, about £40 a year, tenable for three years:—A. C. Wood.

Clothworkers' Exhibitions (£30 each):—
Chemistry, T. P. Hilditch.
Physics, J. H. C. Searle.

Mayer de Rothschild Research Scholarship in Mathematics (£60):—A. R. Richardson.

Tuffnell Scholarship, Chemistry (£80 per annum for two years):—F. Baker.

Fielden Research Scholarship in German:—L. A. Willoughby.

Hollier Scholarships (£60):—
Greek, Gerald Gould.
Hebrew, A. Cohen.

Heimann Medal, German:—L. A. Willoughby.

Morley Medal, English:—F. Allen.

Malden Medal and Scholarship:—Gerald Gould.

Quain Studentships:—English (£150 per annum), J. H. G. Grattan, B.A.; Biology (£100 per annum), Agnes Robertson, B.Sc.

1851 Exhibition Science Scholarship (£150):—Winifred Smith, B.Sc.

Derby Zoological Scholarship (about £120):—H. B. Fantham, B.Sc.

Chadwick Scholarship in Municipal Engineering (£100):—L. T. Wilson.

David Salomons Scholarship in Electrical Engineering (£50):—F. C. Prentice.

B. *FACULTY OF MEDICINE.*

Atchison Scholarship (£55 per annum for two years):—S. A. Owen.

Atkinson Morley Surgical Scholarship (£45 per annum for three years):—*H. T. Mant.*

Fellowes Gold Medals:—T. L. Evans, G. W. Sudlow.

Erichsen Prize:—E. D. Whittle.

Sharpey Physiological Scholarship:—

J. M. Hamill (from Oct. 1904).

Medical Entrance Exhibitions and Scholarships:—

Bucknill Scholarship £30 a year for 4 years ..... E. C. T. Rigg.

C. E. Shattock, £63.

C. J. Rogerson, £63.

£84, F. J. F. Barrington.

£42 each *eq.* J. Lewis, J. R. C. Canney.

IV. DEGREES AND EXAMINATIONS FOR DEGREES. UNIVERSITY OF LONDON.

January 1*st to December* 31*st*, 1905.

Examination.	No. passed from University College.	No. from Univ. Coll. in Honours or First Division.

VI. DEATHS OF MEMBERS OF THE COLLEGE.

The Council regret to have to record the deaths of the following Members:—

The Right Hon. Sir M. E. Grant Duff.
Miss E. Grove (formerly Principal of College Hall).
A. P. Head, Esq.
C. Heath, Esq. (formerly Holme Professor of Clinical Medicine).
Dr. A. S. Murray.
T. Osler, Esq. (Senior Fellow).
Sir John Burdon Sanderson (formerly Jodrell Professor of Physiology).
Sir J. Simon.
J. Smith, Esq.
W. Cave Thomas, Esq.
J. Warren, Esq.
Prof. A. S. Wilkins (Fellow of the College and Professor of Latin in the University of Manchester).

The list includes the names of many whose valuable services to learning, education, and to the College are gratefully remembered.

The Council regret to have to record the deaths of Mr. J. M. Horsburgh, M.A., formerly Secretary of the College, and of Mr. J. Elliott, who had been in the employ of the College for nearly 50 years, having been Foreman Carpenter for the last 30 years.

VII. RECORD OF THE YEAR,

FEBRUARY 1905—FEBRUARY 1906.

HONOURS AND APPOINTMENTS.

The Council have great satisfaction in recording the following Honours:—

The President (Lord Reay) has been appointed a Privy Councillor.

Lord Edmond Fitzmaurice, M.P. (Member of Council and Life Governor of the College), has received the honour of a Peerage, and has been appointed Under Secretary of State for Foreign Affiairs.

Mr. Augustine Birrell, K.C., formerly Quain Professor of Comparative Law, and Life Governor of the College, has been appointed President of the Board of Education.

A Knighthood has been conferred on Emeritus Professor A. B. W. Kennedy, Life Governor of the College.

A Telford premium was awarded by the Institution of Civil Engineers to Prof. Vernon-Harcourt.

The Senatus Academicus of the University of Edinburgh have announced their intention of conferring an Honorary Degree of Doctor of Laws on Professor G. D. Thane.

The following, being past or present Professors, or former Students of the College, or pupils of the School, have recently been elected Members of Parliament:—

J. S. Ainsworth, Esq.
W. W. Benn, Esq.
Rt. Hon. A. Birrell (President of the Board of Education).
Rt. Hon. J. Chamberlain.
J. F. Cheetham, Esq.
Sir W. J. Collins.
Rufus Isaacs, Esq., K.C.
Prof. F. Mackarness.
Sir P. Magnus.
H. H. Marks, Esq.
N. Micklem, Esq., K.C.
Rt. Hon. J. Morley (Secretary of State for India).
W. R. Rea, Esq.
A. Rendall, Esq.
Herbert Samuel, Esq. (Under Secretary of State for Home Affairs).
Stuart M. Samuel, Esq.
Sir E. Sassoon.
T. McKinnon Wood, Esq.

THE SECRETARY.

Mr. Walter W. Seton, M.A., a former student who had done good service to the College as Assistant and afterwards as Acting-Secretary, has been appointed Secretary.

PROFESSORIAL AND OTHER APPOINTMENTS.

Faculty of Arts and Laws.

1. A new Chair of Roman Dutch Law has been constituted, and Mr. F. Mackarness has been appointed to the Professorship.
2. Dr. E. S. Shuckburgh has been re-appointed Assistant in Ancient History for one year.
3. Dr. Wolf has been appointed a Lecturer in Logic.
4. Mr. A. T. Shearman has been appointed Assistant in Logic.
5. Dr. R. A. Williams has been appointed Lecturer in Phonetics for the remainder of the Session, *vice* Dr. Edwards, resigned.
6. Mr. J. H. Walker has been appointed Assistant in Coptic.
7. Mr. W. G. Hartog has been re-appointed Assistant in French for one year.
8. Mr. G. Udny Yule has been re-appointed Newmarch Lecturer for a further period of three years.
9. Mr. L. Solomon has been re-appointed Assistant in Latin and Greek for one year.

Faculty of Science.

1. Professor Vernon Harcourt has resigned the Professorship of Civil Engineering and Surveying. The following Resolution was adopted by the Council:—

> "That the Council in accepting with much regret the resignation of Professor L. F. Vernon-Harcourt of his office of Professor of Civil Engineering and Surveying, desire to place on record their high appreciation of the services he has rendered to the College during his long connection with it, and of the distinction he has conferred upon the Chair he has held."

No appointment has yet been made to the Professorship of Civil Engineering and Surveying, vacant through Prof. Vernon-Harcourt's resignation. The work of the Department is being carried on by lecturers appointed for the current Session. Mr. H. Deans lectured during the First Term on Railway Engineering; during the Second Term, Mr. A. T. Walmisley will lecture on Roads, Street Paving, and Tramways, while Mr. W. N. Blair will lecture during the Third Term on Waterways, Docks and Marine Works. Mr. M. T. Ormsby assisted by Mr. E. Sprague has undertaken the instruction in Surveying.

2. Dr. G. A. Buckmaster, formerly of St. George's Hospital, has under the scheme for the concentration of Preliminary and Intermediate Medical Studies been transferred to the department of Physiology of this College and has been appointed Assistant-Professor.
3. Mr. W. McDougall has been re-appointed Reader in Experimental Psychology for one year.
4. Mr. Dakin has been appointed an Honorary Assistant in the Department of Physiology.

5. Dr. R. H. Aders Plimmer has been re-appointed Assistant in Physiology for three years.

6. Miss Goodyear has been re-appointed Assistant in the Geology Museum for one year.

7. Messrs. Blakeman, Ormsby, Sprague, and Dr. Alice Lee have been re-appointed Assistants in the Department of Applied Mathematics.

8. Mr. B. B. Willcox has been appointed Demonstrator in the Department of Applied Mathematics for one year.

9. Mr. F. J. Kean has been appointed Demonstrator in the Department of Mechanical Engineering for one year.

10. Miss Kathleen Burke has been appointed Assistant in the Department of Chemistry.

11. Messrs. Gibson, Hilditch, Stewart, Tuck, and Winterson have been appointed Demonstrators in the Department of Chemistry.

12. Miss E. N. Thomas has been appointed Demonstrator in the Department of Botany.

FACULTY OF MEDICINE.

1. Professor F. T. Roberts has resigned the Holme Professorship of Medicine and Clinical Medicine, and the Physicianship to the Hospital. The following resolution was adopted by the Council :—

> "That the Council in accepting with much regret the resignation of Professor F. T. Roberts of his offices of Holme Professor of Medicine and Clinical Medicine and Physician to the Hospital, desire to place on record their high appreciation of the services he has rendered to the College and Hospital during his long connection with them, and of the distinction he has conferred upon the Chair he has held."

The title of Emeritus Professor of Medicine and Clinical Medicine has been conferred on Prof. Roberts; he has been appointed Consulting Physician to University College Hospital.

2. Sir Thomas Barlow has been appointed to succeed Prof. Roberts as Holme Professor of Medicine and Clinical Medicine.

3. Dr. F. J. Poynton has been re-appointed Sub-Dean for one year.

4. Mr. W. B. L. Trotter has been appointed to the Demonstratorship in the Department of Anatomy *vice* Mr. P. M. Heath, resigned.

5. Dr. A. C. Stevenson has been appointed Assistant in the Department of Pathology.

6. Mr. N. F. MacLeod has been appointed Assistant in the Department of Hygiene.

REPRESENTATIVES.

1. The President (Lord Reay) has been re-elected as the Representative of the Council on the Senate of the University of London.

2. The Treasurer (Sir Richard Farrant) has been appointed the Council's Representative on the City Parochial Foundation, *vice* Sir William Ramsay, resigned.

3. The Principal (Dr. Gregory Foster) has been appointed the Council's representative on the Central Foundation Schools, *vice* Mr. Baily, resigned.

4. The Principal (Dr. Gregory Foster) and Prof. Hill have been re-appointed the Council's Representatives on the London Inter-Collegiate Scholarships Board, of which Mr. Alfred Attoe (Senior Clerk of the College) has been appointed Secretary.

5. The Principal (Dr. Gregory Foster) and Prof. Hill were appointed to represent the Council at the Conference of Representatives of the Colleges and Universities on Circular No. 530 of the Board of Education referring to the training of Elementary Teachers and their place in Universities.

6. Sir Thomas Barlow has been appointed Representative at the Fifteenth International Congress of Medicine in 1906.

7. Prof. Cormack has been re-appointed the Council's Representative on the Joint Scholarships Board.

8. Mr. Claude Crompton has been appointed the Council's Representative on the Chelmsford Grammar School, *vice* Mr. S. L. Brunton, resigned.

9. Professor W. A. Osborne has been appointed to represent the Council at the Jubilee of the University of Melbourne in 1906 and to present the Latin address from the Council, kindly prepared by Prof. Housman.

10. Prof. Kenwood has been appointed to represent the Council at the Royal Sanitary Institute Conference on Smoke Abatement and at the Bristol Sanitary Congress.

THE COLLEGE AND THE UNIVERSITY OF LONDON.

The Incorporation of the College in the University.

The Bill to promote the Incorporation of the College in the University, a copy of which was circulated with the last Annual Report, passed through both Houses of Parliament with only slight additions, alterations, and variations. It received the Royal Assent on July 5th, 1905. A copy of the Act entitled "The University College London (Transfer) Act, 1905," is enclosed.

The Commissioners appointed under the Act have provisionally fixed September 1st, 1906, to be the Appointed Day for all purposes of the Act.

The Council has appointed a Committee to communicate with the Commissioners on all subjects relating to the Act. The Hospital Committee and the Faculty of Medicine have also appointed Committees. The Senate of the University have likewise appointed Committees for the purpose of facilitating and aiding the completion of the Transfer.

In connection with the scheme for the Incorporation of the College the Council, in conjunction with the various Committees concerned, have taken further steps with regard to the building of the School of Advanced Medical Studies and for the Boys' School. (See p. 26 and p. 30.)

Concentration of Preliminary and Intermediate Medical Studies.

The University, in conjunction with the Councils of University and King's Colleges and with the various Medical Schools, have taken steps to promote the Concentration of Preliminary and Intermediate Medical Studies. The Medical Schools of Westminster and St. George's Hospitals agreed to give up the teaching of these studies from the beginning of the current Session. Other Medical Schools are considering a scheme of Concentration.

Inter-collegiate Lectures.

Students who will complete their medical curriculum at St. George's Hospital Medical School began attendance for their Preliminary and Intermediate Studies at University College in October.

The system of Intercollegiate Lectures instituted six years ago by University and Bedford Colleges has, during the past year, been considerably extended both in the Faculty of Arts and in the Faculty of Science with satisfactory results.

Departmental Committee on the Royal College of Science.

The Council was represented by Lord Reay on the Departmental Committee on the Royal College of Science in connection with the proposals for the institution of a College of Technology at South Kensington. The Committee issued a preliminary report last June. In response to the invitation of the Committee the Council appointed the Principal, Professors Cormack, Fleming, and Pearson, as delegates to confer with the Departmental Committee, and empowered them to transfer to that Committee their memorandum, in which great stress was laid on the importance of incorporating the new institution in the University.

The final Report has just been issued.

The Council feel that the scheme can only be satisfactorily carried out if the new College or combination of Colleges is brought within the University of London, not merely as a School of the University but by incorporation. It is impossible to establish two practically independent systems of Imperial and Local University Education in the Metropolis without serious overlapping and the certainty of rivalry and friction. The University of London is the only body by which University Education in London can be controlled, and University College has given the strongest proof of its acceptance of the principle by agreeing to incorporation in the University.

If a great independent College of Technology were established, the good results which University College anticipated from its own incorporation would be frustrated.

The Council then are heartily in accord with the arguments adduced in the Report in favour of incorporation; they approve the addendum *, signed by Lord Reay and Sir Arthur Rücker, and they desire that no time shall be lost in appointing a Royal Commission

---

* The addendum is:—

MEMORANDUM B.

We are of opinion that it is desirable in the interests of higher education and of the new Institution that steps should be taken as soon as possible to incorporate it in the University of London.

The Engineering profession would gain increased representation on the Senate and be brought into closer touch with all technological education of University rank in London. On the other hand, the general supervision of the Senate would afford a guarantee that interests other than those directly connected with the South Kensington site would be respected. In the past, competition between the State-supported Royal College of Science and other institutions has been prevented by charging high fees at the former. If this safeguard is abolished, it should be replaced by the unification of all the financial interests involved under the ultimate control of the Senate.

(Signed) REAY.
ARTHUR W. RÜCKER.

to deal with the relations between the University and the proposed College of Technology.

The results of the first year's work of the Intercollegiate Scholarships Board were eminently satisfactory. There were a larger number of candidates for Entrance Scholarships than there have been for many years. The Worshipful Company of Drapers have renewed their grant of £100 to meet the expenses of the Board for the Session 1905–06. The Intercollegiate Scholarships Board.

The provision of the University Regulations whereby Graduates of other Universities can be admitted as Internal Students to work for the higher degrees of the University of London is likely to increase the large amount of advanced and original work, the output of which has always been a characteristic feature of this College. During the past year there were in all 119 Post-Graduate and Research Students in the College. Post-Graduate and Research Students.

APPEAL FOR FUNDS.

The Appeal Committee have proceeded with their work since the issue of the last Report. They have succeeded in completing the amount necessary for Incorporation mainly by the munificent donation of Mr. E. G. Bawden, who on the advice of Mr. Edgar Speyer has given a capital sum of £16,000.

The Committee have issued a Report on the work of the past year, a copy of which is sent with this Report for the information of Members.

BENEFACTIONS.

The Worshipful Company of Fishmongers have made a donation of £1000 towards the Fund for the Incorporation of the College in the University. The Fishmongers' Company.

The following resolution was adopted by the Council (Feb. 22nd, 1905) and ordered to be transmitted to the Clerk of the Worshipful Company of Fishmongers:—

> "That the Council of University College, London, of which the Warden of the Worshipful Company of Fishmongers is a Governor, desire to convey to the Court of that Company their best thanks for their timely and generous donation of £1000 towards the fund required for the Incorporation of the College in the University of London."

Mr. E. G. Bawden has made to the Council a gift of £16,000, to complete the sum of £200,000 required for the Incorporation of the College in the University. This sum—the capital of which cannot be spent—will be known as the "Bawden Fund." It forms part of the gift of £100,000 handed over by Mr. Bawden to be allotted by Mr. Edgar Speyer. The "Bawden Fund."

The following is the Minute of the Council (Nov. 6th, 1905) on the subject:—

"The following letter was presented:—

"SPEYER BROTHERS,
7 Lothbury, E.C.
8th September, 1905.

"The SECRETARY,
"The Fund for Advanced University Education and Research,
"University College, Gower Street, London, W.C.

"DEAR SIR,

"*Bawden Fund.*"

"I have much pleasure in confirming to you the announcement made by me in the public press on the 4th instant that your Fund will participate to the extent of

£16,000
(Sixteen Thousand Pound sterling)

in Mr. E. G. Bawden's gift of £100,000 to be applied to purposes of charity and benevolence, and for the advancement of knowledge, especially in aid of human suffering.

"As soon as the necessary formalities have been arranged, I will communicate further with you with regard to the above-mentioned matter.

"Yours faithfully,
"EDGAR SPEYER.

"On the motion of the Treasurer, the following resolution was adopted unanimously and ordered to be communicated to Mr. Bawden and Mr. Speyer:—

"That the most grateful thanks of the Council be offered to Mr. E. G. Bawden and to Mr. Edgar Speyer for providing and allotting the sum of £16,000—to be known as the 'Bawden Fund'—to the Fund for Advanced University Education and Research, thereby making up the balance of the sum of £200,000 necessary to complete the financial arrangements for the Incorporation of the College in the University. The Council are of opinion that by promoting the Incorporation of the College in the University they can most effectually realise the purposes for which the College was founded and can best advance the cause of learning and science.

"They feel therefore that they can congratulate Mr. Bawden and Mr. Speyer on helping to complete an arrangement that is likely to have a far-reaching influence in the furtherance of advanced education and research in London."

The Drapers' Company.

The first of the five annual grants of £400 promised by the Worshipful Company of Drapers for "further assisting the statistical work and higher teaching of the Department of Applied Mathematics" has been received, and has enabled new and important work to be done (p. 26).

Jane Lloyd Bequest.

Under the will of the late Miss Jane Lloyd the College will receive a benefaction, the amount of which is not yet known, for Scholarships in Political Economy and Modern Greek.

The Chadwick Trustees.

The Chadwick Trustees have continued their valuable assistance to the Departments of Hygiene and Municipal Engineering.

The Crabb Robinson Trustees.

The Crabb Robinson Trustees made grants amounting to £209 for the purposes set out in the Accounts, thereby greatly adding to the welfare of the students. They have also voted £50 for the improvement of the Refectory furniture, and have made further grants during the current session.

A grant of £164 10s. has been made by the Engineering Appeal Committee for the improvement of the equipment of the Department of Mechanical Engineering. The Engineering Committee.

A Bronze Bust of the late Professor Arthur Strong has been executed by the Countess Gleichen and presented to the College by the subscribers to the "Arthur Strong" Fund. The Bust was unveiled in the General Library on July 6th, by the Rt. Hon. Lord Burghclere, and received on behalf of the College by the President (Lord Reay). "Arthur Strong Memorial."

Mrs. Strong has also presented to the College a writing-table and a library chair which belonged to her late husband.

The Executors of the late Mr. F. D. Mocatta, and the Jewish Historical Society as beneficiaries under his Will, have transferred to University College Mr. Mocatta's valuable Library, subject to the reservation of certain rights to the Jewish Historical Society. The Council have undertaken to provide permanent accommodation for the Library as soon as adequate space is available, the books being at present accommodated in the General Library. The Jewish Historical Society have undertaken to raise a fund for the upkeep of the Library and to provide additions from time to time, and to form the nucleus of a Museum of Jewish Antiquities. The Council desire to place on record their appreciation of this valuable addition to the Libraries. "The Mocatta Library."

Owing to the energy of Prof. Karl Pearson, a Fund for the better Astronomical Equipment of the Chadwick Observatory and of the Drapers' Company Transit House has been started. The subscriptions (p. 34) to the Fund amounted at the end of the financial year to £146. A further sum of £300 is still needed for this purpose. The Astronomical Equipment und.

The Council desire also to acknowledge the following valuable gifts:—

1. By Messrs. Dick, Kerr & Messrs. Blackwell, samples of materials used in Electric Tramway Construction.
2. By Mr. G. Udny Yule, a number of star catalogues and works on Stellar Photometry to the Department of Applied Mathematics.
3. By Prof. Chadwick, a collection of Surveying Instruments.
4. By Prof. Vernon Harcourt, a gift of diagrams and of models for the Department of Civil Engineering; and a collection of books from the Milan International Congress.
5. By the Countess Gleichen, a pedestal for the Strong Bust.
6. By Mr. MacLeod, a sparking-coil for use with a petrol-motor.

Lists of Annual Subscribers and Donors are given on pp. 33 & 34. The Council desire to call attention to the importance of maintaining and extending the list of annual subscriptions. Not only are such subscriptions a means of increasing the revenue of the College, but they serve a most important purpose in all applications to public bodies. The Treasury more particularly attaches great importance, in making its grants, to the amount of local aid that has been given to the College. Annual Subscriptions and Donations.

THE TREASURY GRANT.

The Council have been in communication with the Lords of His Majesty's Treasury in regard to the allocation of the increased grant, and in response to their Lordships' invitation have set forth their views in a memorandum thereon.

Out of the total grant of £100,000 available for the financial year

1905–06, the Treasury have assigned to the College £10,000. They have reserved a sum of £11,000 for distribution among the various Universities and Colleges for special purposes, including therein the provision of Research facilities, of books and apparatus, and of a pension fund. The Council with the assistance of the Senate are considering their recommendation for a scheme for the Pension Fund. The further allocation of the Treasury Grant will be in the hands of a Committee specially appointed by the Lords of the Treasury, which Committee will also undertake the quinquennial visitations of the Colleges.

COOPERATION WITH THE LONDON COUNTY COUNCIL.

The arrangement with the London County Council whereby the properly qualified students of the London Day Training College take their Degree Courses at the College has now been in operation for three years. Of the students who entered in the first year 13 completed a full three years' course and took their Degrees; the students who have entered in the two subsequent years are better prepared and more able to profit fully from the College Courses.

The Council have also been glad to co-operate with the London County Council in providing University Courses for Teachers on Saturday mornings. Four such Courses are being held during the current Session.

THE WORK OF THE COLLEGE.

It is impossible here to enter into the details of the Work of the College and to do justice to its many Departments. Some of the more important events and developments are dealt with below, and further particulars are recorded in the Deans' Reports, which are printed in the Calendar.

The Session (1904–05) of the Faculties of Arts and Laws and of Science was brought to an end by an Assembly of those Faculties, at which the prizes and medals were distributed by Lord Edmond Fitzmaurice. An account of the proceedings is printed in the Calendar.

The prizes and medals in the Faculty of Medicine were distributed at a meeting of that Faculty by the Principal.

The Session (1905–06) of the Faculty of Medicine was opened by an important address from Prof. Kenwood on Preventive Medicine—Past and Present, which has since been published in the Journal of the Royal Sanitary Institute (Vol. 26. no. 10).

Postgraduate Courses.

Publications.

The Council attach very great importance to the provision of Postgraduate Courses and to the original work done by the Teaching Staff and Students of the College. A special prospectus of Postgraduate Courses is now issued and will be found in the Calendar. The lists of original papers and other publications during the year 1904–5 are appended to this Report. (See Appendices II. & III. pp. 35–47.)

FACULTY OF ARTS AND LAWS.

There is a satisfactory and continuous growth in nearly all the Departments of this Faculty, the only exceptions being the Law Departments. The new curricula in Law issued by the University of London have not led to an increase in the number of Law students. It is hoped, however, that the constitution of a Faculty of Laws and of a Board of Studies in Law in the University may lead to growth and development in the Law Departments.

The grant from the Secretary of State for India for promoting the work of the Indian School has had a beneficial effect. It has been possible to provide books and apparatus that were urgently required.

Indian Sch and Depa ments of Oriental Languages.

All of the twelve students for the Indian Civil Service who spent their probationary year at the College passed their Final Examination, six of them materially improving their places and the other six maintaining their places.

Fourteen candidates for the Indian Civil Service have entered for the current Session.

The Secretary of State for India has kindly undertaken to continue the 'Bibliotheca Indica' and the Journals of the Asiatic Society of Bengal and of the Bombay Branch of the Royal Asiatic Society.

There are proposals for the development of the teaching of the Oriental Languages and for the provision of opportunities of research therein in connection with the University and with the Asiatic and other Societies. The Council are desirous of assisting in providing increased facilities for these studies, but are anxious that any new scheme should give due recognition to the work the College has already done in connexion with them and is prepared to continue in the future.

The Council, on the advice of Prof. Gardner, have joined the Senate of the University of London in making representations to the authorities of the British Museum recommending the formation of a Gallery of Casts for teaching purposes, and have received an encouraging reply from the Trustees of the Museum.

The De partment Archæolog and Galle of Casts.

The work of the Department of Egyptology increases year by year, and makes the need for increased space the more pressing. The annual exhibition, showing the results of Prof. Petrie's exploration during the preceding winter, was held in July.

The De partment Egyptolog

The commencement of the new buildings for the School of Advanced Medical Studies, made possible by the generous donation of Sir Donald Currie, necessitated the removal of the Department of Architecture from Nos. 135 and 137 Gower Street, where it was temporarily located. It has been necessary again to make temporary arrangements for the housing of this Department by reconstructing and altering No. 132 Gower Street, vacated by Messrs. Titmas, and by acquiring for a period of three years No. 88 Gower Street. By these means the immediate needs of the Department of Architecture have been met, but the importance of finding a permanent home for this Department must again be emphasised.

The D partment Architectu

The Council have been in communication with the Board of Architectural Education through their representatives, Prof. Gardner and Prof. Simpson. There is every indication that the demand for architectural training will in the course of the next few years considerably increase.

A most successful Class in Design has been instituted by Prof. F. M. Simpson. Mr. R. Blomfield and Mr. Leonard Stokes are Visitors, and Mr. Oglesby is the Instructor. The Visitors set subjects in turn. The drawings made by the students include small scale plans, elevations, and sections, and detailed drawings to larger scale. The class opened in October with 14 students.

At the suggestion of the Council the Trustees of the Gladstone Memorial Prize for History have adopted a scheme making the award of the Prize biennial and its value £10. The Council believe that this will be a further encouragement to the development of the historical studies of the College.

The Glads Memori Prize.

FACULTY OF SCIENCE.

The Department of Physics.

In order to meet the needs of the Department of Physics and as part of a scheme for the gradual improvement of the various Departments of the College, an additional storey was built to the Carey Foster Laboratories during the Long Vacation. The Physics Theatre was also reconstructed so as to provide accommodation for 132 students.

The Departments of Chemistry.

The need for additional space in the Departments of Chemistry was so pressing that the Council decided to put a mezzanine floor in the rooms immediately behind the Chemical Theatre, thus providing two additional Practical Rooms, and meeting for the time being the increased demand for space.

The Department of Applied Mathematics. (The Drapers' Co. Grant.)

The first of the five annual grants of £400 made by the Drapers' Company has been used for two purposes, namely:—(1) The payment of Assistants and Computators; (2) To the extent of £150 towards the erection of the Drapers' Company Transit House on the South Lawn.

A special Astronomical Equipment Fund has been started and has reached the sum of £146. For the effective astronomical equipment of the College a further sum of £300 is needed. It has been possible with the resources in hand to purchase the Crossley Transit Circle and accessories. This will be installed in the Drapers' Company Transit House.

These new developments have slightly checked work in other directions, particularly in the direction of publications. Two further papers have, however, been published in the Drapers' Research Memoirs Series since last year; one on the stresses in shafting and axles suddenly started or checked—a matter of considerable practical importance,—and the other dealing with the relationship between vital characters when it can no longer be expressed by a simple proportion. There are several complete memoirs waiting publication, in particular a long second memoir on masonry dams dealing experimentally with the strains observed, which it is intended to issue in the Drapers' Series.

Of the assistants provided by the grant, Mr. Blakeman, M.Sc., has published two memoirs, one of them dealing with the interesting point of the probable brain-weights of the living as determined from external measurements; Dr. Lee has done an immense amount of calculating work not only on the stresses in rock and ice masses for a paper in course of preparation, but also for various biometric memoirs which have appeared or are about to appear. Miss Alexandra Wright has been chiefly engaged in a long piece of microscopic work on the variability of drones, queens, and workers in the Hymenoptera. Apparatus, material, or assistance have been provided out of the grant for researches on the stresses in dams by Professor Pearson and others; for experiments on the stresses in material close to surfaces subjected to friction by Mr. Pollard; for experiments on the theory of errors by Dr. Betz; for investigations into the inheritance of pathological conditions in families by Professor Pearson; for co-operative investigations into the inheritance of plant characters; and for a variety of other researches at present in progress in the statistical laboratory. Twelve postgraduate and research students from English and Scottish universities, from Germany and from America, have been working in the Laboratory during the past year; and aid has been again sought by a number of outside bodies and private individuals in difficulty as to the tabulation and reduction of statistical material. The increase in the number of research students has led to an

extension into Gower Street, where two rooms have been provided for research workers adjacent to the University of London Eugenics Laboratory; and it is hoped that two or three rooms may be ultimately provided, when the College buildings are extended, for an adequate Drapers' Company Statistical Laboratory.

The Depa ment of Zo logy.

Prof. Minchin received ten months' leave of absence for the purpose of research work at Entebbe, Uganda, as Special Commissioner of the Tropical Diseases Committee of the Royal Society: he has published a first report on his work, and has brought home a great deal of material for further investigation. During his absence the work and administration of his department were ably discharged by Dr. Chalmers Mitchell, Mr. Cunningham, and Dr. Chubb.

The De partment Botany.

Owing to the enterprise of Professor Oliver and his staff an important addition has been made to the facilities for work by the establishment of a station at Erquy, Brittany. Much good work has already been done there. A Second Edition of the Catalogue of the Collection of Sections of Fossil Plants has just been issued, and bears testimony to the growth of the department and the excellence of its administration.

THE FACULTY OF MEDICINE.

School Advanced Medical Studies.

The contract for the buildings of the School of Advanced Medical Studies has been accepted and the work has been begun. It is expected that these buildings will be ready for occupation by September 1907. With the consent of the St. Pancras Borough Council it has been arranged to connect the Medical School buildings and the Nurses' Home with the Hospital by two tunnels. The buildings of the new Medical School make ample provision for the work of Advanced Medical Studies and also for Research Laboratories in Pathology, Clinical Medicine, and Clinical Surgery.

Chair o Pharmaco- logy.

Prof. A. R. Cushny began his work in the Chair of Pharmacology last May. It has only been possible at present to allot him one room. His Department is in need of further accommodation. Towards the institution of this Chair it will be remembered that Mr. Henry S. Wellcome gave the sum of 100 guineas, and Mr. Carteighe has promised the sum of £100 a year for three years. It is desirable to raise a permanent Endowment Fund as soon as possible.

Mercers' L tures on Physiology Digestion.

In the Department of Physiology, in consequence of the grant from the Mercers' Company special public Courses have been delivered by Prof. Starling, at which there was an average attendance of 100 persons.

Clinical Lectures.

Clinical Lectures have been delivered weekly during the Winter Session by Members of the Hospital Staff in rotation and have been well attended. These Lectures will be continued during the Summer Session and will, it is hoped, become a permanent feature of the clinical instruction of the Faculty of Medicine.

THE LIBRARIES.

The Donations to the Libraries, for which the Council desire to express their appreciation, are given in Appendix IV.

Over 7000 books have been added to the libraries during the past year. This total is made up as follows. The Mocatta Library (4600 vols.); 500 books presented by Professor Chadwick, many volumes being from the library of the late Sir Edwin Chadwick; 187 books and pamphlets presented by Lord Reay; 110 books and pamphlets (chiefly foreign periodicals) presented by Sir William

Ramsay; 250 foreign periodicals presented by the British Association; 184 German works purchased out of funds provided by the University; and 1178 other books, pamphlets, and periodicals, either presented, or purchased out of College funds.

(a) *The Science Library.*

During the Session 1904–5, keys of the Science Library were issued to 48 students. The regulations respecting the inspection of the Science Library have been reconsidered; in accordance with the new regulations, all keys were called in at the end of June, and reissued to 107 students in the first term of 1905–6.

The books received by the British Association in exchange for their publications are presented by the Association to the College, and the Geologists' Association, by housing its library at the College, makes an important addition to the periodicals available. There is, however, great need for further funds for the purchase of books and the upkeep of periodicals.

(b) *The Modern Language Library.*

The University of London has continued its grant to the German section of this library. Keys of the library have been issued to 11 students in the Session 1904–5, and to 18 students in the first term of the Session 1905–6.

(c) *The General Library.*

Many of the older books have been removed from the General Library in order to provide room for additions. These books have been placed in a book-store outside the South Library. A bust of the late Professor S. Arthur Strong—the presentation of whose Oriental Library to the College was recorded in the last Report—has been given to the College, and placed in the General Library, in the bay in which the Strong Library is shelved.

A very necessary reform is the relaying, in oak, of the floor of the General Library, and the provision of a layer of some fire-proof material to isolate the Library from the laboratories below.

A show-case for the storage and exhibition of old and rare books has been constructed.

Certain books needed for use in the Department of Architecture have been temporarily placed there: the arrangement to be reconsidered when the Yates Library is allowed more adequate space, and enlarged so as to include Mediæval Archæology.

(d) *The Mocatta Library..*

The most important addition to the libraries during the past year is the gift of the "Mocatta" Library. This collection, which contains about 4600 volumes, was formed by the late Frederic David Mocatta, and transferred to the College under the circumstances explained on page 22. The collection was made with the object of forming a Jewish library, which should in a large measure contain works dealing with the Jews and their history, and it is probable that the library will be developed in the future on such lines. At present, however, the Mocatta library may be regarded as covering a very wide field. It includes valuable works on Egyptology and Archæology, as well as General History and Literature, and current works of reference. The whole collection is very well bound, and the handsome cases in which it was housed, when in Mr. Mocatta's possession, have also been presented to the College.

(e) *The Medical Library.*

The library is becoming overcrowded, and in many parts the books have to be placed on the shelves in double rows.

THE MUSEUMS.

The work of reorganising the Geology Museum has steadily continued during the year. A case displaying the physical properties of minerals has been arranged. The "Bonney" Students Reference Library has been instituted and has received valuable gifts from Sir John Evans, Dr. Marr, Mr. Whittaker, Prof. Bonney and others, while many specimens of fossils and rocks have been presented by past Students, among whom the Department is specially indebted to Mr. P. de G. Benson.

In the Museum of Zoology the microscope-slide collections have been completely re-arranged.

Considerable additions have been made to the exhibitions in the Egyptology Museum during the past year, making the want of space more evident than before.

The Museum of Anatomy and Pathology has received valuable gifts during the past year from Professors and from past and present Students, the number of new specimens amounting to 114. The third and last volume of the Surgical Catalogue has boen compieted.

EVENING LECTURES AND MEETINGS.

The College has been open during the past Session five evenings in the week.

The Lectures delivered by Mr. Stopford Brooke and arranged by the Committee of the Stopford Brooke Lectureship Fund have been attended by about 600 persons.

The Evening Courses in Architecture have been attended by 52 students. (See p. 25.)

Prof. Brandin's Public Lectures were well attended.

The meetings of the Philological Society, the Students' Political Economy Club, the Geologists' Association, and the University of London Musical Society are held regularly in the College.

Courses organised by the University of London Extension Board are also held in the College.

Several Educational Societies and Organisations have held meetings. The Council are glad to welcome such Societies.

UNION AND OTHER STUDENT SOCIETIES.

The reports of the Students' Societies show that the corporate life of the College is in a healthy condition.

Students' Representative Council.

The Report of the Union Society which is presented each year is especially interesting. In the past year on the initiative of the Union Society the Students' Representative Council for the University of London was formed, Mr. W. L. Scott and Mr. B. B. Willcox, both students of the College, being appointed respectively President and Secretary.

Students' Congress.

On the invitation of the Union Society the second meeting of the British University Students' Congress was held at the College from June 28th to July 1st. The members of that Congress, which included delegates from all the Universities of Great Britain and Ireland, except

Oxford and Cambridge, were received in the General Library by Lord Reay, Principal Sir Arthur and Lady Rücker, and Principal and Mrs. Gregory Foster. A detailed report of the proceedings of the Congress has been published and may be obtained from the publishers, Messrs. Sherratt & Hughes (65 Long Acre). From this report it will be seen that a great deal of useful work was done.

Foundation Week.

Foundation Week was held during the week of the Congress. The Oration was delivered on Thursday, June 29th, by Dr. (now Sir) A. B. W. Kennedy, F.R.S., on "The Academic Side of Technical Training."

The Conversazione.

A Conversazione, organised by the Council and Senate with the co-operation of the two Students' Unions, was held on the evening of June 28th.

The special Societies not included in the Union have done excellent work.

The University College, London, Union Magazine was successfully launched last Session. It is a more imposing and more comprehensive publication than its predecessor, the College Gazette.

THE REFECTORY.

The work of redecorating and re-equipping the Refectory and the Kitchens in connection therewith has been carried on with satisfactory results. The Council are indebted to the subscribers to the Special Fund for this purpose for enabling them to carry out this much needed work. A further sum of £300 is required to cover the cost.

THE PEEL MEMORIAL FUND.

The income of the Fund was expended in the purchase of books presented to:—

(1) Union of Lancashire & Cheshire Institutes, Manchester.
(2) Science and Art Institute, Wolverton, Northampton.
(3) Mechanics' Institution, Stalybridge.

VIII. UNIVERSITY COLLEGE SCHOOL.

New Site and Buildings.

The foundations of the new buildings at Frognal have been completed to the entire satisfaction of the architect (Mr. Arnold Mitchell) by Messrs. Dove, the contractors: tenders for the superstructure have been invited.

On Wednesday, November 1st, a large and well-attended Meeting in support of the Appeal for the remainder of the money necessary for the erection and equipment of the new buildings was held at the Hampstead Town Hall, on the invitation of the Mayor, Alderman Donald MacMillan, who presided.

Amongst the speakers were His Excellency the Japanese Minister Viscount Hayashi, Sir William Job Collins (Chairman of the London County Council Education Committee), Mr. C. A. Russell, K.C., Dr. E. Collingwood Andrews, Dr. Gregory Foster (Principal of University College),—all old boys of the School—Dr. H. J. Spenser (Headmaster), Mr. H. Weston Eve (a former Headmaster), and Mr. Walter Baily (of the Council). Viscount Selby, also an old boy of the School, was prevented by illness from attending, as he had promised. An Appeal Committee, with Lord Mansfield as Chairman, was appointed: the Committee is vigorously prosecuting the Appeal.

The following table shows the number of boys in the School in

each of the three terms of the last six sessions and in the first and second terms of the current session :—

	1st Term.	2nd Term.	3rd Term.	Average for the year.
1899–1900....	309	314	335	319
1900–1901....	351	345	342	346
1901–1902....	368	383	375	375
1902–1903....	399	415	409	408
1903–1904....	383	377	380	380
1904–1905....	378	383	359	373
1905–1906....	384	374		

So far as can be judged at present, the Re-organisation scheme has been very successful. Under the Re-organisation scheme two periods per week of every boy's Time-table are devoted to gymnastics; accordingly it has been necessary to add a Director of Physical Exercises and an Assistant to the permanent staff.

Forty-seven boys have passed the Matriculation Examination of the University of London, seven boys have passed the Intermediate Examination in Science, and three Scholarships have been obtained at Oxford and Cambridge, two for Classics and one for Mathematics and Science.

The Commercial Department was at Midsummer inspected and examined by the University of London. In the course of the report Dr. Roberts states :—"It will be seen from the above summary that the work of the Commercial Department reaches a high level of excellence. The staff is well chosen, and singularly keen and capable." Three boys, viz. G. Cork, C. K. Roberts, and S. G. Smith, passed the Intermediate Examinations in Science (Economics) in the Second Division. There were 71 boys in the Department at the beginning of the Session 1905–6.

A list of the Honours of the year is contained in the School Prospectus: the following are the more important :—

Case Exhibition (£20)	*I. G. Rankin.*
Horton Memorial Scholarship	*A. Goodwin.*
Juliana de Rothschild Prize	*A. Goodwin.*
Major Scholarship, University College, Oxford	*A. McFadyean.*
Major Scholarship, Brasenose College, Oxford	*F. Goodyear.*
Exhibition and Sizarship, Trinity College, Cambridge	*G. I. Taylor.*

THE BRANCH SCHOOL.

The School has been re-organised on the Form system adopted in the recent re-organisation of University College School; the same scheme of physical exercises has been adopted. The curriculum is in process of being made more strictly preparatory. The Prizes were distributed on July 19th by Alderman Donald Macmillan, J.P., Mayor of Hampstead.

There are now 64 boys in the School.

IX. UNIVERSITY COLLEGE HOSPITAL.

The Hospital, built by the generosity of the late Sir Blundell Maple, is now completed and, with the exception of one ward of 24 beds at present used by Nurses, is in full working order. The remaining portion of the Out-Patient Department, comprising the General Medical and Surgical Waiting Hall, Medical, Surgical, Skin,

Ophthalmic, and Dental Examining rooms, Ophthalmic and Skin Waiting-room, a fully-equipped Electro-Therapeutic Department and Dispensary, and the Main Entrance in Gower Street, were opened on the 8th of August. In connection with the new Dispensary, electrical plant with the latest and best improvements has been laid down for the manufacture of drugs and ointments. On the 29th of September, Wards were opened containing 86 additional beds and cots, comprising 48 general Medical and Surgical beds, a Diphtheria Ward of 8 beds, Isolation Wards containing 8 beds, all in the North Wing, and the Children's Ward, containing 28 cots, in the East Wing—the beds now available (allowing for 6 cots transferred from the General Wards to the Children's Ward) being 277.

The number of Patients attending the Out-Patient Department has so much increased of late years, that the Committee thought it desirable to appoint two special Casualty Officers, one Medical and the other Surgical, to deal with the Casualty Department.

The University College Hospital Ladies' Association has been honoured by the acceptance by Her Majesty the Queen of the position of Patron to the Association.

The Committee have received from the Ladies' Association the Annual donation of £100 towards the support of the Association Bed, and in addition a further gift of £50 towards the support of a second bed for the latter half of 1905. Many useful garments have also again been received for the Patients.

The Committee much regret to report the following deaths which have occurred during the past year:—

Christopher Heath, Esq., F.R.C.S., LL.D (Consulting Surgeon), who since 1866 had given the Hospital his valuable services and had added greatly to its reputation. The keen interest which Mr. Heath took in everything connected with University College and Hospital is recognised by all, and the Committee feel that his death has deprived the world of an eminent Surgeon, the College of a great Teacher, and the Hospital of a sincere friend.

Rev. A. R. Godson, M.A., Chaplain to the Hospital since 1885.

The Committee have received with much regret during the past year the resignation from the active Staff of Dr. Frederick J. Roberts, B.Sc., F.R.C.P., who was appointed Assistant Physician in 1870 and Physician in 1878, and has rendered during that long period most valuable services.

The following appointments have been made during the past year:

Dr. F. T. Roberts, B.Sc., F.R.C.P.—Consulting Physician.

Dr. J. S. R. Russell, F.R.C.P.—Full Physician in Charge of Beds.

Dr. Batty Shaw, F.R.C.P.—In charge of Children's Medical Beds *vice* Dr. Russell.

Dr. C. Bolton, M.R.C.P.—Assistant Physician in charge of Out-Patients.

Mr. H. Tilley, F.R.C.S.—Surgeon in charge of Ear and Throat Department *vice* Mr. Johnson.

Mr. E. S. Worrall, M.R.C.S. (Radiographer).—Medical Officer to Electro-Therapeutic Department.

Mr. R. H. Cooper, L.S.A.—Assistant Medical Officer to Electro-Therapeutic Department.

Mr. A. B. Kingsford, M.R.C.S., L.R.C.P.—Second Assistant Anæsthetist.

Mr. P. M. Heath, F.R.C.S.—Surgical Registrar *vice* Mr. Trotter.

Rev. J. A. Garton, M.A.—Chaplain *vice* Rev. A. R. Godson, deceased.

APPENDIX II.

List of Publications in the Faculty of Arts and Laws since the Dean's Report in the Calendar, 1904–1905.

Department of Latin. (Professor A. E. Housman.)

Professor A. E. Housman.

(1) D. Junii Juvenalis saturae. (E. Grant Richards.)
(2) Tunica retiarii. (*Classical Review*, xviii. pp. 395–8.)
(3) On Virgil Aen. iv. 225. (*Ibid.* xix. pp. 260–1.)

Department of Greek. (Professor J. A. Platt.)

Professor J. A. Platt.

Notes on Julian. (*Classical Review.*)

Department of Comparative Philology. (Professor J. P. Postgate.)

Professor J. P. Postgate.

(1) On Statius *Thebaid* ix. 501. (*Classical Review*, xviii. p. 301.)
(2) The Latin Future Infinitive. (*Ibid.* xviii. pp. 450–456.)
(3) Tibulliana. (*Ibid.* xix. pp. 213 *sqq.*)
(4) On Horace *Epoda* xv. and Seneca *Herc. Oet.* 335 *sqq.* (*Ibid.* xix. p. 217.)
(5) Ad Siluas Statianas Siluula. (*Philologus*, 1905, pp. 116–136.)
(6) *Pharsalia Nostra.* (On the proper title of the battle of "Pharsalia" or "Pharsalus," *Classical Review*, xix. pp. 257–260.)

A. P. Savúndranâyagam (with revision by Prof. J. P. Postgate).

(7) *Repraesentatio Temporum* in the *Oratio Obliqua* of Caesar. (*Classical Review*, xix. pp. 207–213.)

Department of Sanskrit. (Professor E. J. Rapson.)

Professor E. J. Rapson.

(1) Note on Ancient Coins collected in Seistan by Mr. G. P. Tate, of the Seistan Boundary Commission. (*Journal of the Roya-Asiatic Society*, 1904, p. 673.)
(2) Ancient Silver Coins from Baluchistan. (*Numismatic Chronicle*, 1904, p. 311.)
(3) The Graeco-Indian Kings Strato I. Soter and Strato II. Philopator. (*Journal of the Royal Asiatic Society*, 1905, p. 164.)
(4) Specimens of the Kharosthī Inscriptions discovered by Dr. Stein in Chinese Turkestan: tentative transcriptions and translations. (Submitted to the Aryan Section of the Oriental Congress at Algiers, 1905.)

Department of Hebrew. (Professor Hermann Gollancz.)

Professor Hermann Gollancz.

Rabbi Akiba: The Life-History of a Jewish Martyr. 1904.

Department of North Semitic Epigraphy. (Dr. H. Hirschfeld.)

Dr. H. Hirschfeld.

(1) The Arabic Portion of the Cairo Genizah at Cambridge, 6th to 10th articles. (*Jewish Quarterly Review*, 1904–05.)
(2) Judah Hallevi's Kitāb al Khazari, translated from the Arabic, with an Introduction. (Nearly ready.)

Department of English. (Professor W. P. Ker.)

Professor W. P. Ker.

Gaston Paris. (*Quarterly Review*, July 1904.)

Department of French. (Professor L. M. Brandin.)

Professor L. M. Brandin.

(1) Victor Hugo. In collaboration with Thomas Seccombe. (*Bookman*, August, 1904.)
(2) Glossaire hébreu-français du XIIIe siècle, publié sous les auspices de l'Académie des Inscriptions et Belles-Lettres. In collaboration with Professor Mayer Lambert, of the Ecole des Hautes Etudes, Paris. (Paris, Leroux, 1905.)
(3) Les Fondements de l'Economie politique. Translation into French of A. Wagner, *Lehrbuch der politischen Oekonomie.* (Brière, Paris, 1905.)
(4) Different Reviews.

W. G. Hartog.

(5) Beaumarchais, Le Barbier de Séville. (Blackie & Son.)
(6) Grammaire française (1ère partie).
(7) Bouilly: l'Abbé de l'Epée. (Blackie & Son.)
(8) The Teaching of French Composition in Upper Forms. (Modern Language Teaching.)

Mary Rosalie Boyd.

(9) Three 15th Century Manuscripts of "Renaud de Montauban." (British Museum, Royal 16 G. ii., Royal 15 E. vi., and Sloane 960.)

Department of German. (Professor R. Priebsch.)

Professor R. Priebsch.

(1) Descriptions of Old German MSS. in the British Museum and the Bibliothèque Nationale, sent to the Archive of the Prussian Academy of Science.
(2) 'Der Weltlohn' eines Nachahmers Konrads v. Wurzburg. Untersuchungen u. Text. (Ready for Press.)

Constance Low.

(3) Richardson's Influence on Wieland. (*Mod. Lang. Quarterly*, 1904.)

Department of Italian. (Professor A. J. Butler.)

Professor A. J. Butler.

Cambridge Modern History. Vol. III. A Chapter on the Close of the Italian Renaissance.

Department of History. (Professors F. C. Montague and A. F. Pollard.)

Professor A. F. Pollard.

(1) Thomas Cranmer and the English Reformation. (Putnams, 1905.)

E. S. Shuckburgh.

(2) A History of Emmanuel College. (Robinson & Co.)
(3) A Volume in the Story of the Nations—Greece. (Fisher Unwin.)
(4) Henderson's Nero. (*English Historical Review*, Oct. 1904.)
(5) "On a certain Passage in Vergil." (*Humane Review*, July 1905.)

Department of Archæology. (Professor E. A. Gardner.)

Professor E. A. Gardner.

(1) A Companion to Greek Studies—Cambridge, 1905. The Sections on *Mythology and Religion*; *Daily life, its surroundings, employments, and amusements*; *House and Furniture*; Revision of section by Mr. F. C. Penrose, F.R.S., on *Architecture*.

K. A. McDowall.

(2) Two Heads related to the Choiseul-Gouffier type. (*Journal of Hellenic Studies*, 1904, ii.)
(3) The so-called Sardanapalus. (*Ibid.* 1904, ii.)
(4) Heracles and the apples of the Hesperides: a new type. (*Ibid.* 1905, i.)

Department of Egyptology. (Professor Flinders Petrie.)

Professor Flinders Petrie.

(1) Ehnasya. 38 pp., 44 plates.
(2) Roman Ehnasya. 15 pp., 31 plates.
(3) History of Egypt from XIX–XXX Dyn. 390 pp. 162 figures.

Miss M. A. Murray.

(4) The Osireion. 43 pp., 37 plates.

E. R. Ayrton, C. T. Currelly, and A. E. P. Weigall.

(5) Abydos III. 54 pp., 61 plates.

Department of Philosophy. (Professors Carveth Read and G. Dawes Hicks.

Prof. Carveth Read.

(1) The Metaphysics of Nature. (A. & C. Black.)

Dr. A. Wolf.

(2) Studies in Logic: the Existential Import of Categorical Predication. (*Cambridge University Press.*)

A. T. SHEARMAN.

(3) Some Controverted Points in Symbolic Logic. (*Proceedings of the Aristotelian Society*, N. S. vol. v.)

Prof. G. DAWES HICKS.

(4 Idealism and the Problem of Knowledge and Existence (*Proceedings of the Aristotelian Society*, 1904–1905.)
(5) Review of Simmel's Kant. (*Mind*, April, 1905.)
(6) Notices of Kantian Literature. (*Mind*, January and April, 1905.)

Department of Experimental Psychology. (Dr. W. McDougall.

Dr. W. MCDOUGALL.

(1) Primer of Physiological Psychology. (Messrs. Dent & Co.)
(2) The bearing of recent experimental works on the problem of the Unity of the Mind. (*British Journal of Psychology*, vol. i. Part iii.) (Abstract only.)

Department of Political Economy. (Professor H. S. Foxwell.)

G. UDNY YULE (Newmarch Lecturer on Statistics).

1) On a Convenient Means of drawing Curves to various Scales. (*Biometrika*, November 1904.)
(2) On the Introduction of the words "Statistics," "Statistical" into the English Language. (*Journ. Roy. Stat. Soc.* June 1905.)

Department of Economic Geography. (Professor L. W. Lyde.)

Professor L. W. LYDE.

A Military Geography of the Balkan Peninsula (in collab. with Colonel Mochlin Feryman.) (A. & C. Black.)

Departments of Hindustani, Bengali, and Hindi. (Professor J. F. Blumhardt.)

Professor J. F. BLUMHARDT.

(1) Catalogue of the Marathi, Gujarati, Bengali, Assamese, Oriya Pushtu, and Sindhi Manuscripts in the Library of the British Museum.
(2) Catalogue of the Library of the India Office. Vol. II, Part IV. Bengali, Oriya, and Assamese Books.

Department of Architecture. (Professor F. M. Simpson.)

Professor F. M. SIMPSON.

(1) A History of Architectural Development. Vol. I. (Longmans, Green & Co., in the press.)
(2) Architectural Education. (*The Architectural Review*, January 1905.)

APPENDIX III.

List of Original Papers and other Publications from the Scientific Departments of the College since the Dean's Report in the Calendar 1904–1905.

Department of Pure Mathematics. (Professor M. J. M. Hill.)

Professor M. J. M. Hill, Dr. L. N. G. Filon, and H. W. Chapman.

On the Projection of Two Triangles on to the same Triangle. (*Proceedings of the London Mathematical Society*, 1905.)

Department of Applied Mathematics. (Professor Karl Pearson.)

The following six memoirs, two of which were at press in the last report, have now appeared in the *Drapers' Company Research Memoirs*:—

(1) Mathematical Contributions to the Theory of Evolution, XIII. On the Theory of Contingency and its Relation to Association and Normal Correlation. By Karl Pearson (pp. 1–35, and 2 plates).

(2) Mathematical Contributions to the Theory of Evolution, XIV. On the General Theory of Shew Correlation and Non-linear Regression. By Karl Pearson (pp. 1–54, and 3 plates).

(3) On a Theory of the Stresses in Crane and Coupling Hooks with Experimental Comparison with Existing Theory. By E. S. Andrews, assisted by Karl Pearson (pp. 1–27, with 3 plates).

(4) On some Disregarded Points in the Stability of Masonry Dams. By L. W. Atcherley, assisted by Karl Pearson (pp. 1–27, with 3 plates).

(5) On the Graphics of Metal Arches, with special reference to the Relative Strength of Two-pivoted, Three-pivoted, and Built-in Metal Arches. By L. W. Atcherley and Karl Pearson (pp. 1–53, with 3 plates).

(6) On Torsional Vibrations in Axles and Shafting. By Karl Pearson (pp. 1–59, with 13 lithographed tables and plates).

Professor Pearson.

(7) Note on the Inheritance of Meristic Characters in *Spinax niger*. (*Biometrika*, vol. iii. pp. 363–5.)

(8) On the Inheritance of Insanity. (*British Medical Journal*, May, 1905.)

(9) Report on the Effect of Inoculation against Enteric Fever in the Army. (*British Medical Journal*, 1904.)

(10) Letter to the Carnegie Trustees on Methods of Promoting Research in the Exact Sciences. (*Year Book No. 3 Carnegie Institute of Washington*, pp. 184–8.)

(11) On the Correlation between Hair Colour and Eye Colour in Man. (*Biometrika*, vol. iii. pp. 459–462.)

M. A. Lewenz and Professor Pearson.

(12) On the Measurement of Internal Capacity from Cranial Circumferences. (*Biometrika,* vol. iii. pp. 366–397, with 2 plates.)

Dr. Ginzo Uchida.

(13) On the Correlation between Age and the Colour of Hair and Eyes in Man. (*Biometrika,* vol. iii. pp. 462–7.)

Emily Perrin.

(14) On the Contingency between Occupation in the case of Fathers and Sons. (*Biometrika,* vol. iii. pp. 467–9.)

J. Blakeman, assisted by K. Pearson and A. Lee.

(15) A Study of the Biometric Constants of English Brainweights, and their relationships to External Physical Measurements. (*Biometrika,* vol. iv. Part i.)

Professor Pearson.

(16) Das Fehlergesetz und seine Verallgemeinerungen durch Fechner und Pearson. A rejoinder to K. Rauhe, and an historical account of the theory of skew-frequency from Laplace to Kapteyn. (*Biometrika,* vol. iv. pt. i.)

F. Cave Browne-Cave.

(17) On the Effect of the Time Factor on the Correlation between the Barometric Heights at stations 1000 miles apart. This paper announced as read in the last Report, has now been published. (*R. S. Proc.*)

Winifred Gibson.

(18) Tables to facilitate the calculation of Probable Errors of Means and Standard Deviations for Frequencies from 1 to 1000. (Ready.)

(19) Dr. Alice Lee, Drapers' Research Assistant, has been engaged nearly the whole of the Session on the further reduction of the observations on School Children. Considerable progress has been made, the sections on (*a*) the relation of Health, and (*b*) the relation of Intelligence to all the other recorded physical and mental characters, and (*c*) the influence of age on these characters, are now completed and ready for publication, but much remains still to be done.

Department of Physics. (Professor F. T. Trouton.)

Professor F. T. Trouton.

(1) On the Vapour-pressure of Water in contact with certain substances. (In course of publication.)

(2) On the Coefficient of Viscous Traction. (In course of publication.)

Professor F. T. Trouton and A. O. Rankine.

(3) On the Stretching and Torsion of Lead Wire beyond the Elastic Limit. (*Phil. Mag.*)

A. W. Porter.

(4) Intermediate Mechanics. (Messrs. Murray.) (On eve of publication.)
(5) On the Conditions under which Lagging is detrimental. (In course of publication.)

C. Cuthbertson.

(6) On the Refractive Indices of the Elements. (*Phil. Trans. Roy. Soc.*)
(7) On the Refractive Index of Fluorine. (*Phil. Trans.*)

Departments of Chemistry. (Professors Sir William Ramsay and J. Norman Collie.)

Professor Sir William Ramsay.

(1) On the relative amounts of Neon and Helium in Atmospheric Air. (*Proc. Roy. Soc.* 1905.)

Professor J. Norman Collie.

(2) A Method for the Ultimate Analysis of Small Quantities of certain Organic Compounds. (*Trans. Chem. Soc.* 1904.)
(3) Synthesis by means of the Silent Electric Discharge. (*Trans. Chem. Soc.* 1905.)

Dr. S. Smiles.

(4) Action of Alkyl Sulphides on α Halogen Ketones. (*Trans. Chem. Soc.* 1905.)
(5) Asymmetric Synthesis of Quadrivalent Sulphur. (*Trans. Chem. Soc.* 1905.)
(6) On some Nitrates of Menthyl Thetine Esters.

A. W. Stewart.

(7) The addition of Sodium Hydrogen Sulphite to Ketonic Compounds. (*Trans. Chem. Soc.* 1905.)
(8) The Velocity of Oxime Formation in certain Ketones. (*Trans. Chem. Soc.* 1905.)
(9) A further Note on the addition of Sodium Hydrogen Sulphite to Ketonic Compounds. (*Proc. Chem. Soc.* 1905.)
(10) The Transmutation of Geometrical Isomers. (*Proc. Chem. Soc.* 1905.)

W. M. Colles.

(11) Formation of Hydrates at Low Temperatures of some Carbonyl Compounds. (Not yet published.)
(12) Note on the Formation of Calcium Ethylate. (Not yet published.)

Zelda Kahan.

(13) On the Action of Heat on Methyl, Ethyl, and Propyl Iodides.

A. W. Bain.

(14) On the Action of Ethyl Iodide on the Sodium Salt of Diacetyl Acetone.

F. Sproxton.

(15) On the Action of Zinc Ethyl on Acetoacetic Ester.

O. Sackur.

(16) Über die Zerfallskonstante der Radiumemanation. (*Ber. d. deutsch. Ch. Ges.* xxxviii. 1905, Heft 7.)

(17) Zur Radioaktivität des Thoriums. (*Ber. d. deutsch. Ch. Ges.* xxxviii. 1905, Heft 7.)

O. Halm u. O. Sackur.

(18) Die Zerfallskonstante der Emanationen des Euraniums und Aktiniums. (*Ber. d. deutsch. Ch. Ges.* xxxviii. 1905, Heft 8.)

O. Halm.

(19) A New Radioactive Element which Evolves Thorium Emanation. Preliminary Communication. (*Proc. Roy. Soc.* 1905, vol. 76. A.)

J. K. H. Inglis.

(20) The Loss of Nitre in the Chambre Process. (*Journ. Soc. Chem. Ind.* 1904, p. 643.)

Leo F. Guttmann.

(21) Determination of Melting-Points at Low Temperatures. (*Trans. Chem. Soc.* July, 1905.)

(22) Percentage Tables for Elementary Analysis (published in English, French, and German).

The following publications have resulted from work in the Spectroscopic Laboratory:—

(1) Spectroscopy. E. C. C. Baly. Longmans & Co.

(2) The Ultra-Violet Absorption Spectra of certain Enol-Keto Tautomerides. Part II. E. C. C. Baly and C. H. Desch. (*Trans. Chem. Soc. Lond.*)

(3) The Ultra-Violet Absorption Spectra of Aromatic Compounds. Part I. Benzene and certain Mono-substituted Derivatives. E. C. C. Baly and J. N. Collie. (*Trans. Chem. Soc. Lond.*)

(4) The Ultra-Violet Absorption Spectra of Aromatic Compounds. Part II. The Phenols. E. C. C. Baly and Miss E. K. Ewbank. (*Trans. Chem. Soc. Lond.*)

(5) The Ultra-Violet Absorption Spectra of Aromatic Compounds. Part III. Certain Di-substituted Derivatives of Benzene. E. C. C. Baly and Miss E. K. Ewbank. (*Trans. Chem. Soc. Lond.*)

Department of Botany. (Professor F. W. Oliver.)

F. W. Oliver and A. G. Tansley.

(1) Methods of Surveying Vegetation on a large scale. (*New Phytologist,* vol. iv. p. 228.)

F. W. Oliver.

(2) Ueber die neuentdeckten Samen der Steinkohlfarne. (*Biolog Centralbl.* 25 Bd. p. 400.)

(3) An Exhibit of Specimens of Seed-bearing Plants from the Palæozoic Rocks. (*New Phytologist,* vol. iii. p. 176.)

RUDOLF BEER.

(4) The present Position of Cell-Wall Research. (*New Phytologist*, vol. iii. p. 159.)

W. C. WORSDELL.

(5) "Fasciation," its Meaning and Origin. (*New Phytologist*, vol. iv. p. 55.)

A. G. TANSLEY.

(6) The Problems of Ecology. (*New Phytologist*, vol. iii. p. 191.) An address delivered to Section K at the Cambridge Meeting of the British Association.

A. G. TANSLEY and F. E. FRITSCH.

(7) The Flora of the Ceylon Littoral. (*New Phytologist*, vol. iv. pp. 1 & 27.)

AGNES ROBERTSON.

(8) Studies in the Morphology of *Torreya californica*.—Pt. I. Spore Formation. (*New Phytologist*, vol. iii. p. 133.) Pt. II. The Sexual Organs and Fertilisation. (*Ibid.* p. 205.)

AGNES ROBERTSON (in conjunction with ETHEL SARGANT).

(9) The Anatomy of the Scutellum in *Zea Mais*. (*Annals of Botany*, vol. xix. p. 115.)

F. E. FRITSCH.

(10) Studies on Cyanophyceæ, II. (*Beihefte zum Bot. Centralbl.* Bd. 18, Abt. 1, p. 30.)
(11) Studies on Cyanophyceæ, III. (*New Phytologist*, vol. iii. p. 216.)
(12) The Occurrence of *Pleodorina* in the Freshwater Plankton of Ceylon. (*New Phytologist*, vol. iii. p. 122.)
(13) Some Points in the Structure of a Young Œdogonium. (*Annals of Botany*, vol. xviii. p. 648.)
(14) The Plankton of some English Rivers. (*Annals of Botany*, vol. xix. p. 163.)

Department of Zoology. (Professor E. A. Minchin.)

Professor E. A. MINCHIN.

(1) A Speculation on the Phylogeny of the Hexactinellid Sponges. (*Zool. Anzeiger*, Bd. xxviii. No. 12, 1905.)

J. T. CUNNINGHAM.

(2) Zones of Growth in the Skeletal Structures of Gadidæ and Pleuronectidæ. (*Report Fishery Board for Scotland*, 1905.)

W. WOODLAND.

(3) On a New Mode of Persistence of the Posterior Cardinal Vein in the Frog (*Rana temporaria*): with a Suggestion as to the Phylogenetic Origin of the Post-Caval Vein. (*Zoologische Anzeiger*, Bd. xxviii. No. 23, 1905.)

(4) Studies in Spicule Formation:
(*a*) The Development of the Spicules in Sycon Sponges.
(*b*) The Development of the Spicules in *Alcyonium digitatum*.
(*c*) The Development of the Skeleton of the Echinopluteus.
(*d*) The Development of the Spicules in *Cucumariidæ*.
(These four papers are at present in the hands of the editors of the *Quarterly Journal of Microscopical Science*.)

H. M. Woodcock.

(5) Section Protozoa in 'Zoological Record' for 1902.
(6) Ditto ditto for 1903.
(7) Section on Trypanosomes in Lankester's 'Treatise on Zoology.'

H. B. Fantham.

(8) On Hermaphroditism and Vestigial Structures in the Reproductive Organs of *Testudo græca*. (*Ann. & Mag. Nat. Hist.* vol. xvi. no. 92.)
(9) *Lankesterella tritonis*, a new Hæmogregarine from the blood of *Molge cristata*. (*Zool. Anzeiger*, 1905, 6 pp. 17 figs. Also in Abstracts of Proc. Zool. Soc. of London, 1905, No. 20, p. 7.)

E. T. Browne.

(10) The Marine Fauna of the Isles of Scilly.—Part I. The Pelagic Fauna. (*Journ. Roy. Instit. Cornwall*, 1904.)
(11) Hydromedusæ, with a Revision of the Williadæ and Petasidæ. 1904.
(12) Scyphomedusæ. 1905. Fauna and Geography of the Maldive and Laccadive Archipelagoes. Vol ii. pp. 722–749, pp. 958–971; 5 plates.

Department of Civil Engineering. (Professor L. F. Vernon-Harcourt).

Professor L. F. Vernon-Harcourt.

(1) "The River Húgli." Paper read at the Institution of Civil Engineers, 17th January, 1905, and awarded a Telford Premium.
(2) Report on "Investigation of the Methods best suited for surmounting great Differences of Level between the Reaches of Canals." *Milan International Navigation Congress*, 1905. 1st Section: Inland Navigation, 3rd Question.
(3) Report on "Conditions affecting the Force of Waves; and the Construction of Breakwaters to resist them." *Milan International Navigation Congress*, 1905, 2nd Section: Ocean Navigation, 4th Question.
(4) "Report on the British Civil Engineering Exhibits at the St. Louis Universal Exhibition, 1904." By the Chairman of the British Civil Engineering Committee of Liberal Arts. *Report of the British Royal Commission*, 1905.
(5) "British Juror's Report on the Civil Engineering and Public Works Exhibits, Groups 25 to 27, at the St. Louis Universal Exhibition, 1904." *Report of the British Royal Commission*, 1905.

(6) "Report of the Chairman of Group Jury No. 26, on the Civil Engineering Exhibits at the Universal Exposition, St. Louis, 1904." Prepared at the request of John A. Octerson, Chief of the Department of Liberal Arts, for publication in the *Official Report* of the Department in the Final Official Report on the Exposition.

Department of Electrical Engineering. (Professor J. A. Fleming.)

Professor J. A. Fleming.

(1) The Propagation of Electric Waves along Spiral Wires, and on an Appliance for Measuring the Length of Waves used in Wireless Telegraphy. (*Phil. Mag.* October 1904: a Paper read before the British Association, August 1904.)

(2) On an Instrument for the Measurement of the Length of Long Electric Waves and also Small Inductances and Capacities. (*Proc. Roy. Soc. Lond.* vol. 74, p. 488, January 1905.)

(3) On the Conversion of Electric Oscillations into Continuous Currents by means of a Vacuum Valve. (*Proc. Roy. Soc. Lond.* vol. 74, p. 478, January 1905.)

(4) On the Application of the Cymometer to the Measurement of the Coefficient of Coupling of Oscillation Transformers. (*Phil. Mag.* June 1905: a Paper read before the Physical Society, March 1905.)

(5) A Note on the Ratio of the Mean Spherical to the Mean Horizontal Candle Power of Incandescent Lamps. (A Paper read to the Physical Society, June 1905.)

(6) On the Conductivity of a Vacuum. (*Technics*, March 1905.)

(7) Electric Waves. (A Series of Articles in *Technics* for August, September, October, November, and December 1904.)

(8) A Treatise on the Scientific Principles of Electric Wave Wireless Telegraphy. (Nearly completed.)

Prof. J. A. Fleming and R. A. Hadfield, assisted by students in the Pender Electrical Laboratory.

(9) On the Magnetic Qualities of Alloys not containing Iron. (A Paper read to the Royal Society, June 1905.)

W. C. Clinton.

(10) A Note on the Voltage Ratios of an Inverted Rotary Converter. (Read before the Physical Society, March 1905.)

G. B. Dyke.

(11) On the Practical Determination of the Mean Spherical Candle Power of Incandescent and Arc Lamps. (*Proc. Phys. Soc. Lond.* vol. xix. p. 399, 1905; *Phil. Mag.* ser. 6, vol. ix. p. 136, January 1905.)

(12) On the Flux of Light from the Electric Arc with varying Power Supply. (A Paper read before the Physical Society of London, March 1905.)

Department of Public Health. (Professor H. Kenwood.)

Professor H. Kenwood.

(1) Canned and Preserved Articles of Food. (*Journal of Royal Sanitary Institute*, 1905.)
(2) The Training in Hygiene at School. (*Transactions of the Conference upon School Hygiene, London*, February 1905.)
(3) The Seasonal Prevalence of Erysipelas and Puerperal Fever. (*Transactions of the Epidemiological Society*, 1905.)
(4) The Æreal Convection of Small-pox. (*Transactions of the Epidemiological Society*, 1905.)

Department of Physiology. (Professor E. H. Starling.)

Professor E. H. Starling.

(1) Croonian Lectures at the Royal College of Physicians, "On the Chemical Correlation of the Functions of the Body."

W. M. Bayliss and Professor E. H. Starling.

(2) On the Relation of Enterokinase to Trypsin. (*Journ. of Physiol.* vol. xxxii. 1905.)

J. Barcroft and Professor E. H. Starling.

(3) On the Oxygen Exchange of the Pancreas. (*Journ. of Physiol.* vol. xxxi. 1904.)

W. M. Bayliss.

(4) The Kinetics of Tryptic Action. (*Archives des Sciences Biologiques*, vol. xi. Suppl. 1904.)

B. S. Schryver.

(5) Researches on the Autolytic Degradation of Tissues.—Part II. On the Influence of the Thyroid Autolysis. (*Journ. of Physiol.* vol. xxxii. 1905.)

F. A. Bainbridge.

(6) The Lymph-flow from the Pancreas. (*Journ. of Physiol.* vol. xxxii. 1904.)

J. H. Parsons.

(7) Degenerations following Lesions of the Retina in Monkeys. (*Brain.*)

Janet Lane-Claypon.

(8) On the Postnatal Formation of Primordial Ova. (*Proc. Physiol. Soc.* 1905.)

W. Page May.

(9) On Localisation in the Brain of the Lemur. (*Proc. Physiol. Soc.* 1905.)

Department of Pathological Chemistry. (Professor Vaughan Harley.)

A. G. Levy.

(1) On the Estimation of Chloroform in Air. (*Proc. Physiological Soc.*, Nov. 1904.)
(2) An Apparatus for Administering Chloroform Vapour mixed with Air in Ascertainable Proportions. (*Trans. Royal Medical & Chirurgical Soc.* 1904–1905.)
(3) A Contribution to the Discussion on Chloroform. Read at the British Medical Association Meeting at Oxford, 1904. (Published in the *British Medical Journal*, Sept. 24, 1904.)
(4) A Regulating Chloroform Inhaler. (*Lancet*, May 27, 1905.)

R. H. Clarke and Sir Victor Horsley.

(5) On the Intrinsic Fibres of the Cerebellum, its Nuclei and its Efferent Tracts. (*Brain*, 1905.)

Sir Victor Horsley.

(6) On a Trigeminal-Aural Reflex in the Rabbit. (*Brain*, 1905.)

F. W. Thiele.

(7) On the Efferent Relationship of the Optic Thalmus and Deiter's Nucleus to the Spinal Cord, with Special Reference to the Cerebellar Influx Theory of Dr. Hughlings Jackson, and Decerebrale Rigidity of Drs. Ord and Sherrington. (*Proc. Royal Society*; *Journ. of Physiology.*)

Cyril E. Corlette.

(8) Some Analytical Determinations of Starch Percentage in Barley-Water and Rice-Water. (*Australasian Medical Gazette*, Jan. 20, 1905.)
(9) A Review of the Subject of Starch Digestion in Young Infants. (Read before the New South Wales Branch of the *British Medical Association.*)

Department of Pharmacology. (Professor A. R. Cushny.)

Professor A. R. Cushny.

(1) On the Secretion of Acid by the Kidney. (*Journ. of Physiol.* vol. xxxi. p. 184.)
(2) On the Action of Optical Isomers.—II. The Hyoscines. (In the Press.)

APPENDIX IV.

LIBRARIES.

The Donations to the Libraries during 1905 were as follows :—

	Vols.	Pmph.
Academy of Natural Sciences, Philadelphia	0	1
Admiralty Medical Department	1	0
Adyar Library, The	0	1
Allchin, Dr. W. H.	1	0
Anatomical Society of Great Britain	0	1
Aristotelian Society	1	0
Army Medical Department	3	0
Ashby, H. T.	2	1
Asiatic Society of Bengal	0	6
Astronomer Royal	2	2
Athenæum, Publishers of the	2	0
Babine, A. V.	1	0
Bagshaw, W.	1	0
Baly, E. C. C.	1	0
Belgium, Government of	1	0
Blackie & Sons, Messrs.	1	0
Board of Education	1	0
Board of Examiners, Calcutta	6	0
Board of Trade	28	0
Brandin, Prof. L. M.	2	0
Brazil, Government of	2	0
British Association	52	200
British Astronomical Association	2	0
British Balneological and Climatological Society	1	0
British Dental Association	1	0
British Food Journal, Editor of the	0	8
British Museum, Trustees of the	14	0
British South Africa Company	1	0
Browne, Prof. E. G.	1	0
Bureau of Standards, Washington	0	1
Cambridge Philosophical Society	1	0
Canada, Government of	1	0
Canadian Pacific Railway	1	0
Cardellach, F.	0	1
Carnegie Institution of Washington	28	2
Central Asian Society	1	0
Ceylon Medical College	0	1
Chadwick, Prof. O.	500	0
Chemical Society	4	0
China Imp. Maritime Customs	11	3
